

Road resurfacing - Donald B. Munro Drive (May 2022)

In 2022, there is approximately \$88 million for roadway renewal and upgrading rural roads. The City's road resurfacing program rehabilitates and improves the driving surfaces of Ottawa's roadways. Localized repairs to both curbs and sidewalks, along with accessibility improvements and updates, are also part of the program. For more information about road renewal, please visit the [construction map](#).

As part of the City of Ottawa's annual infrastructure maintenance cycle, road resurfacing will occur along Donald B. Munro Drive to improve this roadway and the overall citywide transportation network.

What: Work will involve select concrete repairs, milling of the existing surface, iron adjustments, resurfacing of the roadway, installation of select paved shoulders, and granular shoulder reinstatement. Increased noise levels and vibrations to be expected in order to facilitate the work.

Why: The City of Ottawa will be resurfacing roads as preventative maintenance aimed at extending the City's roadway network lifecycle.

When: This work is expected to start in **May 2022** and completion is anticipated by fall 2022. Work will take place between the hours of 7 am and 10 pm as required. Donald B. Munro Drive will remain open to traffic with lane closures expected.

Where: Work will occur along Donald B. Munro Drive from Thomas Argue Road to March Road.

Who: The City of Ottawa has retained the Contractor, Aecon Construction Ontario East Limited, to resurface Donald B. Munro Drive.

If you own a subsurface lawn irrigation system, we encourage residents to contact the undersigned to identify and confirm that private irrigations systems have been disconnected or relocated.

Accessibility

Accessibility is an important consideration for the City of Ottawa. The City makes every effort to provide access through and around construction sites. If you require special accommodation, please contact the project team listed below. [Accessible formats \(link is external\)](#) and communication supports are available, upon request.

Impact on the right of way and adjacent private properties

The reconstruction is within the City's right of way but may result in some disruption to part of the private property directly adjacent to the work. The City will reinstate all sections of landscaping, driveways and walkways that are disturbed by construction. However, if you have plants or any other assets located within the City's right of way that you want to preserve, we suggest that you may want to move the plants in preparation for the construction work.

Parking

As the various road reconstruction activities are in progress on your street, on-street parking will be restricted. In the event that access to your driveway is restricted due to construction activities, a Temporary On-Street Parking Permit (orange form) will be distributed to permit on-street parking within two blocks of your residence.

Construction disruptions

The Contractor will take every precaution to minimize interruptions to the normal life of your family and/or operation of your business, but as you can appreciate, there may be some inconvenience during construction. We would like to thank you in advance for your patience and co-operation. For construction activity hours of work, the City of Ottawa follows provincial requirements and the City's Noise By-law (2017-255).

Contact information

For any emergency outside normal working hours on weekdays and weekends, please call the City at 3-1-1. For further information about this project, please contact the City's Project Manager.
